What Aurora IQ offers

TURORA"

Image quality

- 50 degrees field of view combined with nonmydriatic operation allow a detailed examination and ease of use in various use cases.
- New high contrast optical design helps to detect small early phase retinal changes.

Intelligent features

- Autofocus and autoexposure allow quick usage of the camera without any setting modifications in various use cases.
- Integrated image quality analysis guides first time users to acquire successful images and therefore minimizes training time.
- Pin code protection can be used for ensuring data safety.

Connectivity

- WLAN and USB connections for image transfer and various ways of handling image data are supported by the camera.
- Integrated Cloud connection allows sending images to an optional AI service for image analysis.
